MORRISANIA GERMAN SAVINGS BANK.

There have been complaints recently on the part of depositors in the German Savings Bank of Morrisania, which was placed in the hands of William J. Best as receiver June 15, 1877. Depositors say that out of a dividend of 90 per cent which it was expected would be declared, only 32 per cent has been paid, and that \$40,000 in bonds was sold for \$800, and \$149,000 for three-eighths per cent per \$100. They also state that they are anxious to have the receiver make an early statement in regord to his management of the funds intrusted to his eare. A Tribune resorter repeated these statements to Mr. Best yesterday afternoon. Mr. Best referred the reporter to his counsel, who made the following statement:

"Whey Mr. Best took possession as receiver the cash on hand was \$351 95. The stocks, bonds and mortgages amounted to \$135,189 99 and the real estate to \$30,922 50, which was bought in under forcelosure of the mortgages. There was \$9,050 received on compromises and \$2,944 11 on judgments. There are claims now in suit pending against the trustees amounting to \$220,969 67. which the receiver expects to have brought to trial next month. A large part of the stocks and bonds which belonged to the bank was pledged by the bank prior to the appointment of the receiver as seenrity for call loans rade to it, which the receiver had to pay before he could get possession of the securities for the purpose of selling them. The Supreme Court approved all the sales made of the securities for the purpose of selling them. The Supreme Court approved all the sales made of the securities for the appointment of the receiver payment. The suits were defended, and two of them were carried to the Court of Appends. As the receiver realized from the assets of the bank for the purpose of making up a deficiency which existed in the bank prior to the appointment of the receiver payment. The suits were defended, and two of them there dividends; the first of 15 per cent, the second of 10 per cent, and the third of 7 pe

BIDS FOR THE DOCK DEPARTMENT

BIDS FOR THE DOCK DEPARTMENT.

The Assembly sub-committee which is investigating the dock system of this city met yesterday at the office of the Dock Commissioners, No. 117 Duane-st. Augustus T. Morris, of the Morris & Cummings Dredging Company, testified that the company had done work for the department at various times prior to 1877, and since that time had worked at different piers under sub-contracts from the Union Dredging Company. Joseph Cummings, a partner of the previous witness, testified that they had done work for the Union Dredging Company about the city piers. They had not had any special contract as to price, but had charged about what seemed right. Their charges for ordinary muddredging were from 25 to 30 cents a yard at the time they put in their bid to the department at 36 cents. They had never charged anyone so much as 36 cents. They had never charged anyone so much as 36 cents. The witness said that he had had conversations with Commissioner Laimbeer, and had given as his reasons for bidding so high that labor would cost more than before, and they would have to turn away better customers if they did the city work. In answer to Commissioner Laimbeer the witness testified as to the efforts of the Commissioner to get the work done more cheaply.

Chandler F. Loomis, superintendent of the Union Dredging Company, which has the contract for dredging for the department, testified that he had put in personal bids for certain work. He had received some contracts at 35 and 33 cents, and had then hired the Union Dredging Company, of which he was superintendent, to do the work for 26 cents a yard. The profits were to be equally divided between himself and Mr. Benson, the secretary of the company. He was receiving a salary from the Union Dredging Company at the time he made the contracts. One of the contracts had netted him seven or eight hundred dollars, and another from ten to fifteen hundred.

The coammittee will meet next Friday morning at the same place.

WAITING FOR THE RAILROAD COMPANIES.

The representatives of the transportation companies are still discussing the amounts to be subscribed by them for the World's Fair. The Commissioners who have labored hardest for the success of the project have informed these companies that they expect them to subscribe \$1.000,000, but only about one-half of this amount has already been subscribed. The New-York Central and Hudson River Railroad has subscribed \$250,000, conditional on a certain amount being raised from other sources. The Pennsylvania and New-York, Lake Eric and Western Companies have subscribed \$100,000 each on the same conditions. William H. Vanderbilt, James H. Rutter, Augustus Schell and other officers of the Central Railroad have subscribed amounts aggregating \$50,000. It is necessary that \$1,000,000 shall be subscribed without restriction before steps can be taken toward the real beginning of the work The Committee on Subscriptions has obtained about \$1,000,000, one-half of which is unreserved The action of the transportation companies is accordingly awaited with a good deal of interest.

WHERE FINE DOGS CAN BE SEEN.

THE BENCH SHOW TO OPEN TO-DAY. HOWLING AND YELPING IN THE AMERICAN INSTI-TUTE BUILDING—THE EXHIBITION TO SURPASS THOSE OF PREVIOUS YEARS.

TUTE BUILDING-THE EXHIBITION TO SURPASS THOSE OF PREVIOUS YEARS.

A chorus of howls and yelps filled the American Institute Building yesterday afternoon, indicating by its volume the near completion of the preparations for the fifth annual Bench Show of the Westminster Kennel Club, which will open at 10 o'clock to-day. The scale of sound ran through several octaves, from the deep bass of Sultan, a superb mastiff, on the left, to the shrill yelps of Bushman and Waldina, two absurd little dachhunds in the centre, which were echoed by the cries of the terriers and pet dogs on the right. But there seemed to be little occasion for their complaints, as the dogs all appeared amply provided with everything necessary to secure their comfort. Five rows of new kennels ran through the middle of the hall, and along the walls on each side are open platforms for the larger dogs. A platform in the centre is intended for Superintendent Lincoln's office, and on each side rings forty-five by thirty-five feet are railed off and covered with sawdust, in which the dogs are to be judged. At the east cud, the machinery hall will be attilized for exercising the dogs, which will be done every morning and evening.

In the abundance of room and convenience of

dogs are to be indeed. At the cast cin, the machinery hall will be done every moning and evening.

In the abundance of room and convenience of arrangement, as well as in the number and evenlence of the dogs exhibited, this show, it is claimed, will surpass any that has preceded it. There is plenty of space for passing between the rows of new kennels, which will be kept clean, and the different classes are plainly indicated by large placards, while each kennel bears the number of its occupant. These numbers begin on the left. First on the open platform next to the left wall are seven pointers and Lass O'Blythe, a rough-haired Bedlington terrier, with a long lank body and big ears, all the property of the Westminster Kennel Club and not entered for competition. The first five classes, which come next, consist of mastifs, Harold, a large fawn-colored mastif, with that have belonging to Oliver K. Hard, Monarch, an immense fawn-colored mastif, with that points, the property of Mrs. A. Hitchewek, and Sultan, owned by H. Delms, were noticeable in the important animals were expected, as only about 400 of the 1.129 dogs that will be exhibited had arrived. Next to the mastifison the left side are the ronable-coated St. Bernards, of which Barry, a tawny dog, was the only representative. Of the champion smooth-coated St. Bernards, Den, crange and tawny, belonging to John P. Haines, was the most noticeable, although Judy and six overgrown and playful puppies from the same kennel also attracted attention. This concludes the dogs on the left parform. The numbers then continue on the platform along the right wall, where are the Newfound-lands, including trist wall, where are the Newfound-lands in the first row of kennels over the property of Dr. S. Fleet Sper, will be noticeable among the right wall where are the Newfound-lands in the first row of kennels over fifty pounds ing.

VIEWED FROM A STANDPOINT.

IT IS NO MORE FATAL THAN ANY OTHER

ORGANIC DISEASE.

THE REASON THERE ARE SO MANY

DEATHS FROM CONSUMPTION

Is because as soon as it is thought persons get that disease they are looked upon as hopeless, and one and all say, doctors included, that there is no use giving any medicine, that it is an incurable disease, and the result is that because it is Consumption it is neglected or left to take its own course. Such inaction is to be condemned as which are the following the person of the person called HALE'S HONEY OF HORE. HOUND AND TAR that will cure nine out of every tem cases of Consumption it used before the image become alcomated and great cavities are formed in them, and even in that stage it will very often effect a cure, provided the strength of the patient is kept up and all the surroundings are favorable, but nobody ought to let a case get in that condition whom it is so easy to prevent it. If HALE'S HONEY OF HORE. the patient is kept up and all the surroundings are favorable, but nobody ought to let a case get in that condition when it is so easy to prevent it. IF HALE'S HONEY OF HORE-HOUND AND TAR was used in every hard cold and sore threat and bronchial irritation there would be no cases developing into Consumption except those of a hereditary tuber-cular character, and where such a hereditary tendency exists it should be watched closely and at the first symptom HALE'S HONEY OF HOREHOUND AND TAR should be one death from Consumption where there are now one hundred. This is undoubtedly the greatest remedy known to the world for Consumption, Coughs, Colds, Sore Threat, Bronchitts, Hoarseness, and Short Breath. Just think of the ingredients and common sense will approve all that is said above.

HALE'S HONEY OF HOREHOUND AND TAR is sold in bottles at 50 cents and \$1, the contents of the latter being HALE'S HONEY OF HOREHOUND AND TAR is soid in bottles at 50 cents and \$1, the contents of the latter being nearly triple that of the 50-cent bottles. The policy of buying the latter, in an economical point of view, as well as to provide against possible emergencies, is therefore obvious. It is still more economical to purchase the \$5 packages of this standard
